

VIM EHB

INTERNAL ELECTROMECHANICAL
ECO-HARD BROACHING MACHINE
TABLE UP – HIGH SPEED

Eco-Hard Broaching Machine:

This electro-mechanical internal broaching machine is capable of broaching materials of up to 62HR hardness utilizing extremely fast cutting speeds.

Designed with the concept of energy efficiency in mind by employing a rack and pinion drive, the Ekin hard broaching machine yields a 50% reduction in energy consumption of the drive motor, and helps us to fulfill our commitment to continuous innovations in the fields of energy efficiency and technology.
