

# “BMS Swaging Press”

## Hydraulic Press for Creating Tapered Splines

**Tapered splines are created by first broaching a straight spline and then tapering the spline using a swaging process.**

**The BMS Swaging machine is the ideal machine for creating tapered splines in Pittman Arms or other parts requiring a tapered spline.**

### **Features:**

- Rugged 4-Post Design
- Small Footprint
- Manual, Automatic or Robot Load Available
- Fully Guarded for Operator Safety
- Tools and Tool Maintenance Supplied and Supported by BMS

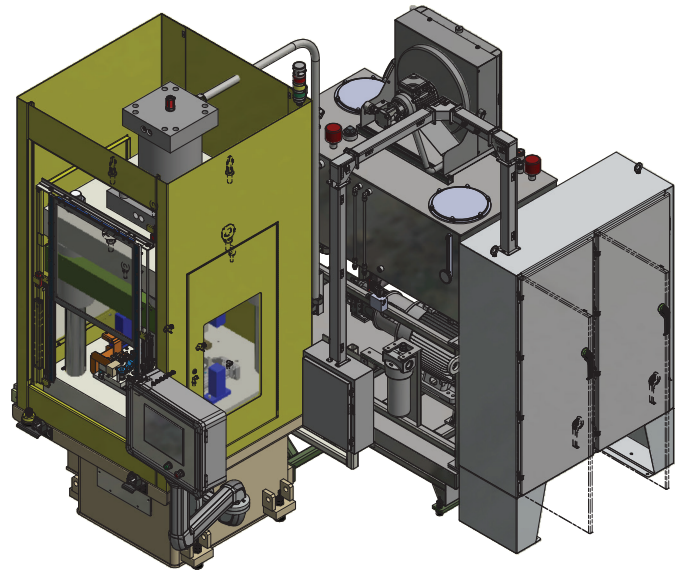

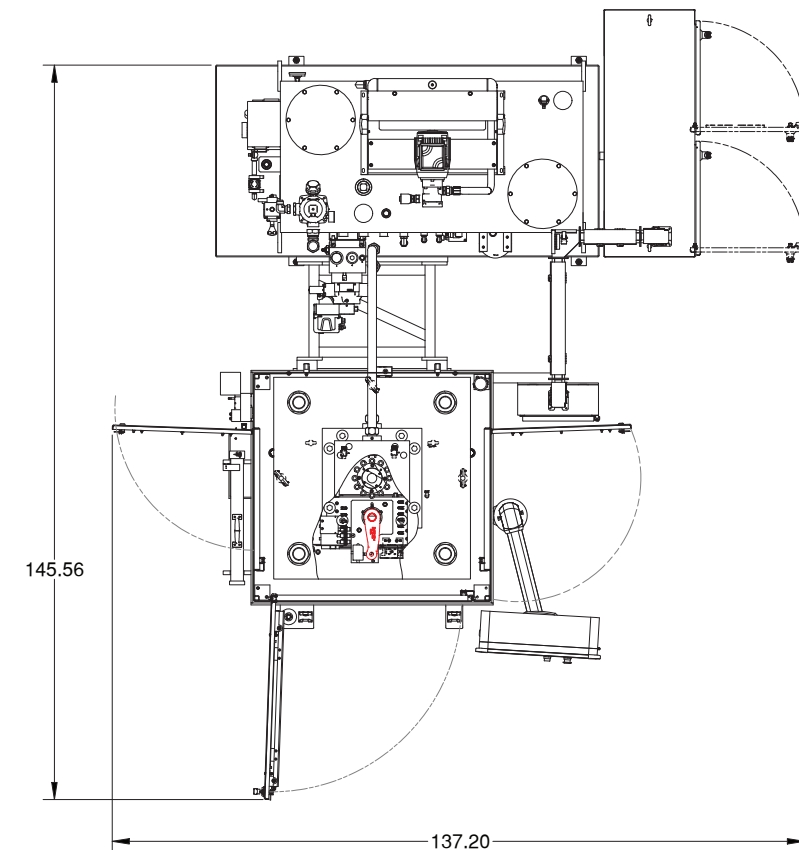

**BROACHING MACHINE SPECIALTIES**  
*customized broaching solutions*
